

Course Student Analytics

In a Canvas course, an instructor can view analytics by student to see Activity, Communications, Submissions & Grades. Analytics may reveal patterns about which students are doing well and which are struggling, the timeliness of submissions, and how students are scoring on an assignment in comparison to their class peers.

Prerequisites:

- Use due dates on assignments
- Have assignments turned in “online” via Canvas.
- When possible, use the Canvas Conversations messages tool

On your **Canvas home page**, **right side** *click*
View Course Analytics. **Student analytics are at the bottom.**

All Students Analytics – table view

Student	Page Views	Participations	Submissions	On Time	Late	Missing	Current Score
Student02	40	4	9	2	2	2	78.57%
Student03	61	9	9	3	4	0	

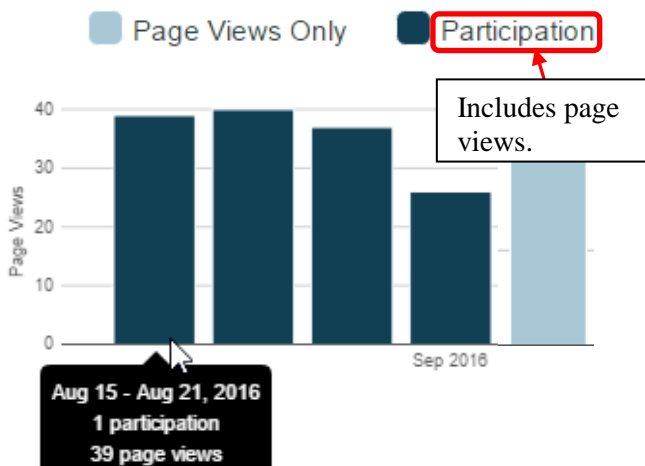

-Click on a student’s name to see **Activity by Date**, **Communication**, **Submissions** and **Grades**.

Current Total: 92.33% 

Student’s current grade total.

Use envelope icon to send student a Conversations message.

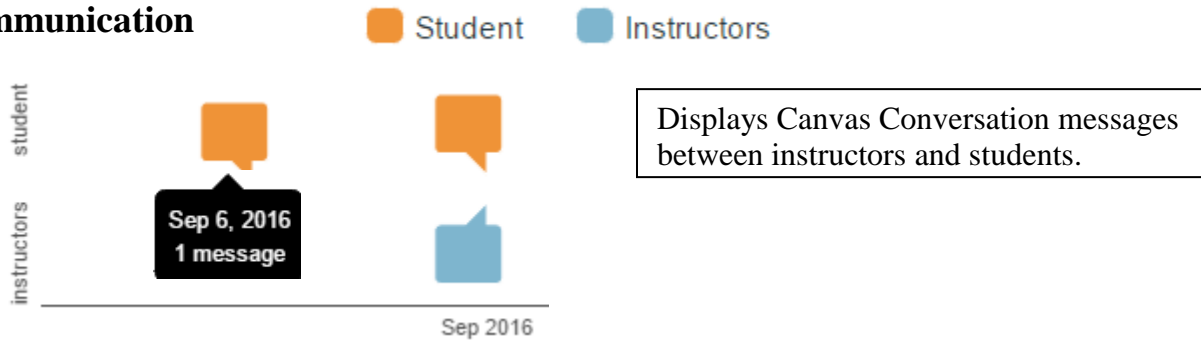

Activity by Date

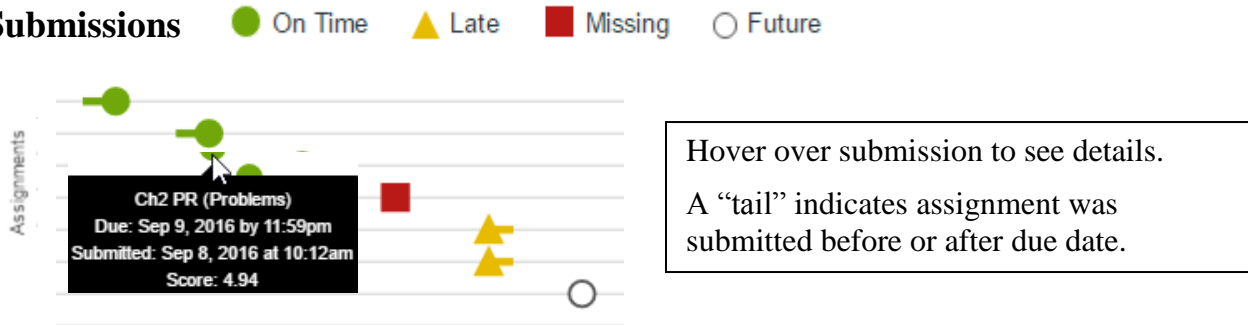

Student Participation includes:

- Collaboration – load, view, edit
- Conference – join
- Discussion – post new comment
- Wiki page – create
- Quiz – start or submit
- Assignment – submits

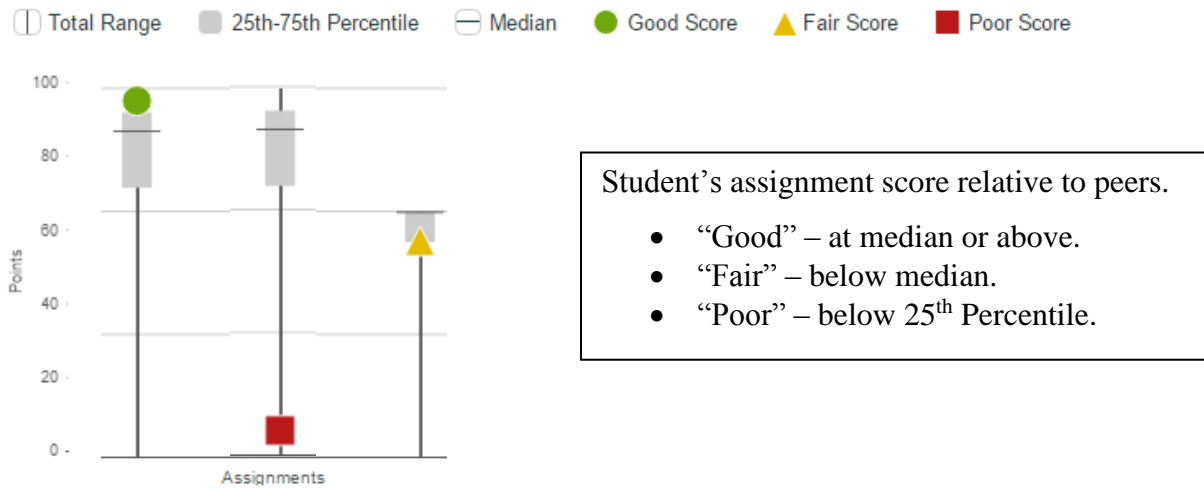

Communication

Submissions

Grades
